Introduction

- ❖ OST got incorporated in New Jersey, USA in the year 1994 as a software consulting and development company catering to mainly large Wall Street Firms and Fortune 500 clients. It started its Indian Operations in 1998.
- ❖ OST provides a broad portfolio of business and technology solutions to help its clients worldwide improve their business performance.
- ❖ Our solution improve the direct corporate performance by enabling all of the major key steps in the management cycle—from planning and budgeting, to measuring and monitoring performance, to reporting and analysis.
- ❖ OST has been working in niche areas of Enterprise Reporting, OLAP, ETL, Business Intelligence, Data warehousing and Document Management Solutions for the last 7years. The technical depth of OST' s veteran management team is unique in these areas, thereby ensuring outstanding performance, reliable service and creative solutions in its business relationships.
- ❖ OST has expertise in developing high-end Web Based & Client/Server technology solutions using various RDBMS and Front-end technologies like Java, .NET, VB, etc
- ❖ OST has a great pool of highly qualified & dedicated software professionals with live industry experience with varied skill sets.

Value Proposition

OST understands that technology is the means to achieve strategic business goals and gain an edge in a highly competitive global environment. OST's experience enables it to understand the service requirements of global organizations to utilize technology round the clock, worldwide and provide customized business solutions.

OST's seasoned team of managers and consultants have pioneered and mastered a level of service that corporate IT managers have been demanding for several years. Since each member of the management team has a comprehensive background in software development and project management, they understand the problems that clients' face while developing and maintaining today's global computerized systems.

We offer our clients a truly unique set of core competencies:

- ❖ Deep business process and industry expertise
- ❖ Advanced analytics and research capabilities
- ❖ Comprehensive understanding of technology solutions and IT infrastructure
- ❖ Proven ability to implement enterprise solutions in a way that delivers bottom-line business value
- ❖ We help our clients realize results at every step of a solution, from strategy to process transformation, application development and delivery.
- ❖ OST addresses the needs of today's corporate IT management by applying technical, application and business experience to a range of corporate technology requirements. OST is a pioneer in the new breed of consulting firms that bring to its clients a high level of integrity professionalism and quality.
- ❖ OST has been built with these key foundation areas. This company mandate, along with strong business ethics, has produced a growing list of successfully implemented projects and satisfied Fortune 500 clients

Services

Actuate

The Actuate Reporting system is the world's leading Enterprise-wide Reporting and BI System and is the product of Actuate Corporation, USA. The Actuate Reporting System allows organizations to rapidly develop, generate and distribute reports via the Internet, thereby increasing accessibility and value of corporate data. The Actuate Reporting System provides a scalable, dynamic reporting platform that can meet the Enterprise Reporting needs of organizations of any size. Actuate's adaptable environment allows developers to create reports from any data source and in any format required by users. It also has tools for helping the end users develop their own reports, OLAP and a unique offering in the Spreadsheet area which allows the company to provide excel like reports over the web with macros and formulae intact. It helps the users to work with the familiar excel format but ensures integrity of data across the company. The latest offerings from Actuate include the unique EII layer which exposes the XML to the users allowing them to develop their own reports and the Corporate Dashboard allowing users the facility of viewing the critical information about their organization in a single window. OST helps in procuring the products and specializes in providing customized business solutions based on Actuate and has implemented a variety of projects for Fortune 500 clients.
